

Use Case

Cinema Theaters and the Liquid Galaxy

We are going to ideate use case of Liquid Galaxy in Cinema Theaters.

About Liquid Galaxy:-

The Liquid Galaxy is an open source project founded by Google. Created in 2008 by Google employee Jason Holt, the Liquid Galaxy started as a panoramic, multi-display viewing that gives the ability to view panoramic video, photos and much more.

- The Liquid Galaxy can play panoramic photos and videos that stretch beyond viewers' peripheral vision, totally surrounding them in another place.

About Cinema theater :-

A movie theater (also called a cinema) is a building that contains an auditorium for viewing films (also called movies), for entertainment. Most, but not all,

theaters are commercial operations catering to the general public, who attend by purchasing a ticket.

The film is projected with a movie projector onto a large projection screen at the front of the auditorium while the dialogue, sounds and music are played through a number of wall-mounted speakers. Since the 1970s, subwoofers have been used for low-pitched sounds. In the 2010s, most movie theaters are equipped for digital cinema projection, removing the need to create and transport a physical film print on a heavy reel.

- The following are the use cases of Liquid galaxy in Cinema theater.

-- This new and impressive technology can be used in many ways.

1) People, those who are hanging around the main hall can use liquid galaxy by watching the new or upcoming movies trailer, song, promos etc in panoramic view.

2) Liquid Galaxy can be used by people to see the movies information like the script of the movies, directory team, etc.

3) It can be used by people to see the shooting sight of movie in panoramic view.

4) It is also used to view any youtube video or any other interesting video in panoramic view as it is connected to internet.

Q. Why the Liquid Galaxy can be used in this area ?

Earlier, there is no technology that gives trailer, songs, etc in the panoramic view in cinema theaters.

But now visitors can view panoramic videos, photos etc in Liquid Galaxy.

This technology increases the interest of people towards cinema theater.

Thanks
